

My name is Musa Naomi. I am a female 35 years of age from a family of ten, eight girls and two boys. I am the sixth born in my family. I completed my secondary school in 2006 at Mateta high school, got married in 2007. By the grace of God on 23rd June 2008 I gave birth to a baby girl. I was very happy with my family and friends. I lived as a house wife until 2014 when I got enrolled at college to study as a teacher. I was very happy because God had answered my prayers of being a teacher. Teaching profession is quite a unique career, I like it because some time back I dreamt that I was teaching in class and I know it's my inner calling.

During my time in college I faced a lot of challenges among which were financial challenge, changing the environment and lack of enough rest. Nevertheless, that didn't stop me from achieving my goal of obtaining a diploma, which I did in 2016 when I graduated and I was declared a primary diploma teacher.

Furthermore, I enjoy being a teacher because it is my career and it encourages me to study even more. I love helping students and teenagers who are academically challenged and I encourage them to study because they are the future leaders of our country. I want all my learners to be successful in life.

In class I have two groups of learners, fast learners and slow learners. When I introduce a topic to them after explanation, fast learners are able to understand quickly while the slow learners have difficulties in understanding. Owing to that fact I changed my teaching style so that even the slow learners they can be able to understand. After class lesson I remain with those who have difficulties in reading and writing doing remedial work. I also have two learners who are noisy in class, so I have put their chairs close to my table so that they don't fight and play around. These are challenges my students face.

Thank you HealthEd Connect, I really appreciate for everything that you have done for me and my team. May the good Lord continue blessing you.

Musa Naomi
