

I am 35 years old. I started teaching at Kasompe Community School of Peace in 2013 as untrained teacher. Then in 2013 April I went to school.

HealthEd Connect helped me in paying back the loan that I got the time I was collecting my primary diploma certificate in 2015.

I enjoy helping learners how to read and write, since I am a grade one and two literacy teacher.

Some of my students face challenges of not having books, school bags, pencils and uniforms.

I help them in small areas like giving them pencils and books to those in need.

I just pray for our able donors to have good healthy so they could continue helping us and our students. If applicable they can even take us for a degree program in the future.

Thank you very much to our able and caring donors.

Sharon Chilambwe
